

**INNOVATION GROUP**  
*Inspiration of Technology*

Starting from a small trading company in 1984 the Innovation Group has evolved into a polymer-led organization through a strong commitment to technology, research and development. We provide a wide range of rubber and polymer products and services to the automotive, electronic, electrical appliance, and general rubber industries. Working with customers, our Research and Development Center commits to delivering the right solutions and a total range of services.

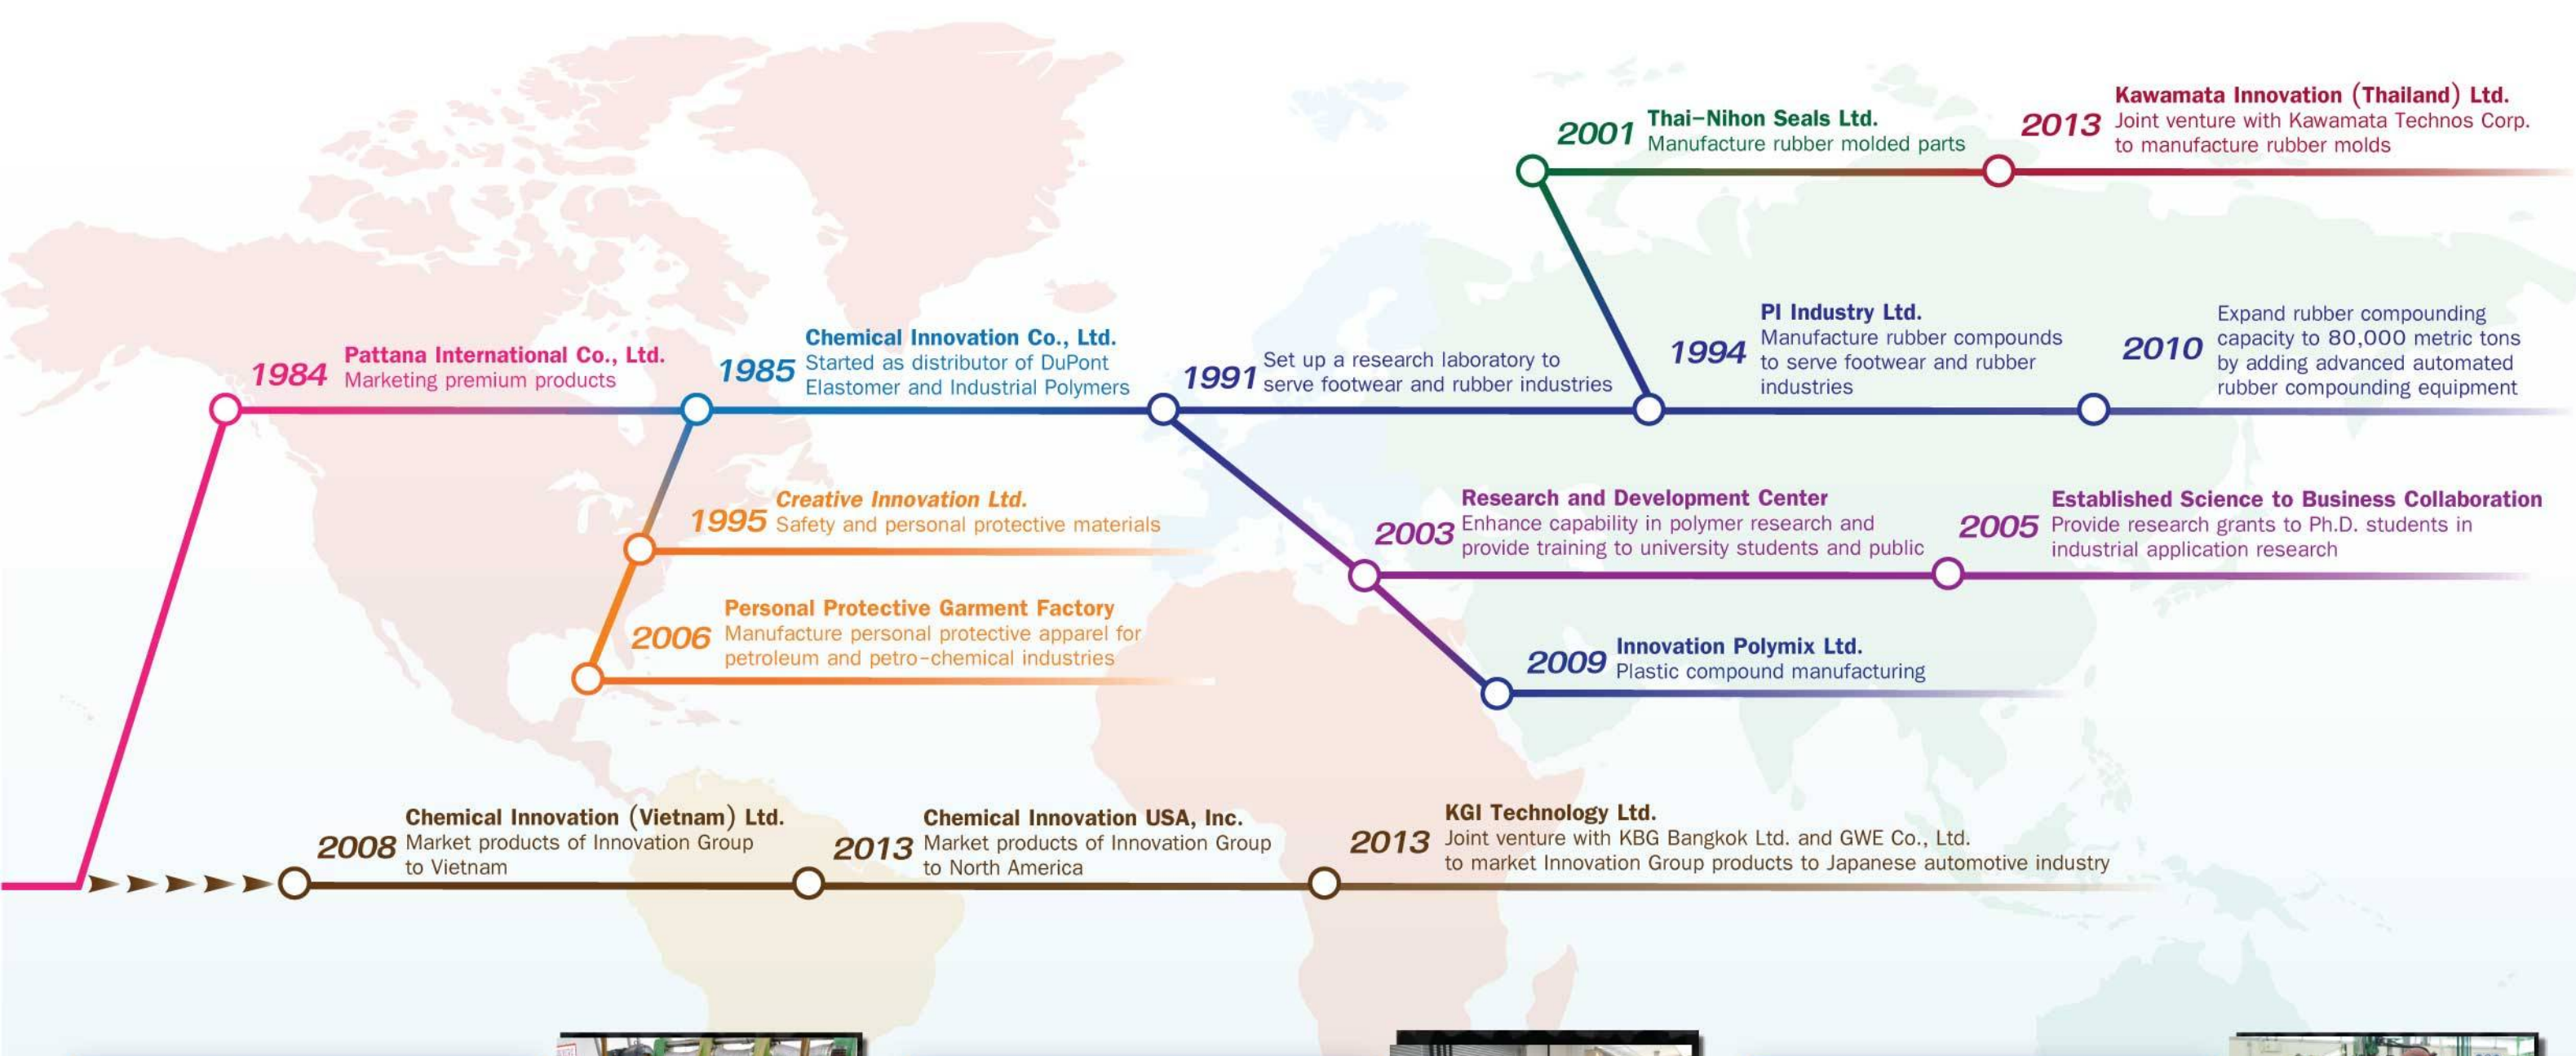

## OUR BUSINESS GROUPS

Polymer Technology Solution Provider

Over three decades of inspiring technology, Innovation Group continues to capture advanced polymer technologies to develop and sustain competence in global markets. We believe in building business along the value chain and serve customers with reliable quality products by balancing technology and service with competitive cost. We look for long term growth by co-operating in joint research and development of potential products and markets together with business partners.

## Products

Innovation Group has grown from a small trading company to a multinational corporation. Our trading companies supply a wide range of rubber, polymers, and chemicals to various industries. The Group's manufacturing companies supply rubber and plastic compounds, personal protective apparel, and rubber molded parts. We work with our corporate partners in various industries to provide an extensive range of products and services.

Silicone Compound

Rubber Molded Parts

Personal Protective Apparel

## Technology

Innovation Group started a small research laboratory in 1991 to gain the knowledge and technology necessary for in-house development of polymers for the footwear and rubber industries. To continue our innovation and supply of internally developed and co-developed compounds, we established our own compounding plant allowing us to capitalize on our commitment to technology, cost containment, and product quality. By utilizing inspiring technology, Innovation Group is providing the next generation of co-research and development to create class leading materials for the growth of our customers and industries.

## Social Contribution

Innovation Group supports a Science to Business link. In collaboration with universities, we provide opportunities for Ph.D. student programs as well as technical training and seminars to the public. In addition the Polymer Technology Summer Camp, at the Innovation Group Technical and Training Center, has been providing university students with hands-on study and research programs during student's summer holidays. This program's opportunity is in great demand by the top chemical and industrial students of local universities.

Innovation Group will continue to contribute to society by providing knowledge and technology to universities and industries.

## OUR RESEARCH AND DEVELOPMENT CENTER

*Technology Makes Things Possible*

In today's market, Innovation Group's key to success is our in-house research and development, technical competence, and capability to transform industry needs to innovation. We constantly innovate by researching industry trends, creating practical applications for research polymers, and listening to our customers.

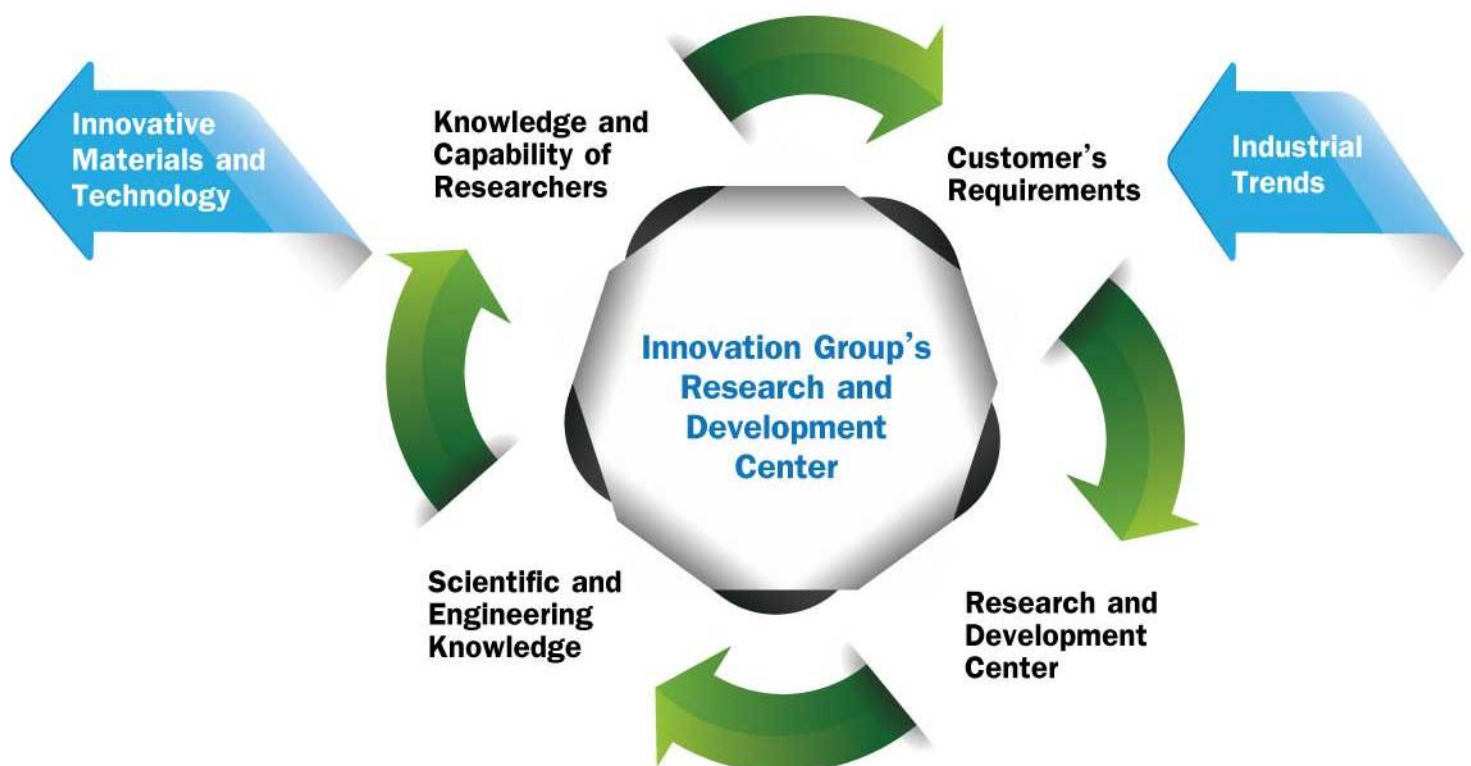

**Co-research with customer** create innovative materials to serve the mutual growth of customers and Innovation Group.

**Technology support** is one of the major functions of the Technology Team of Innovation Group by providing product development, process technologies, and technical problem solving.

**Technology Center** provides technical training to the staff of Innovation Group and technical knowledge to university students and industry.

**Our laboratory is certified by  
ISO/IEC 17025:2005**

## TECHNOLOGY AND INNOVATION CYCLE

## OUR TOTAL VALUE CHAIN

Innovation Group provides “One-Stop Service” for raw materials, polymer technology solutions, and the final customer delivery of polymer compounds and finished rubber parts.

### RAW MATERIALS

International sourcing and supply for a wide range of rubber polymers and chemicals

### CUSTOMER

### TOTAL SUPPLY CHAIN

Total supply chain provides lowest cost for delivery of products to customer destinations

## INNOVATION GROUP TOTAL VALUE CHAIN

### TECHNOLOGY SOLUTION PROVIDER

Technology center provides technical solutions, suggestions and technical advice

### POLYMER COMPOUND MANUFACTURING

Advanced technology in processing rubber and plastic materials provides quality polymer compounds

### RUBBER PARTS AND MOLD MANUFACTURING

Material design, mold manufacturing and molding of rubber parts
